

## CURRICULUM VITAE

Full Name: **Nguyễn Quang Chiến**  
Apply for position: **Software Engineer**  
Phone: 0971676882  
Email: [quangchien2503@gmail.com](mailto:quangchien2503@gmail.com)  
DOB: 25/03/1993

### SUMMARY INFORMATION

Good ability in web app developing  
Have good skills in backend developing  
Programming Languages: NodeJS, Ruby, Python, PHP  
Databases: MySQL, PostgreSQL, MongoDB.  
Network: TCP/IP, LAN  
Certification: AWS Certified Cloud Practitioner

### EDUCATION HISTORY

From: 09/2011 To: 09/2015	Thai Nguyen University: Degree/Qualifications: Bachelor of Engineer Major in: Electricity
------------------------------	-------------------------------------------------------------------------------------------------

2018	Course in FPT Software
------	------------------------

### EMPLOYMENT HISTORY

From: 04/2018 To: 09/2019	Company: FPT Software Website: <a href="https://www.fpt-software.com/">https://www.fpt-software.com/</a> Job Title: Software Engineer for IT FPT Software. Job Description: Teamwork, contact with real project (Social listing, NSFW detector) ...
------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>From: 09/2019</p> <p>To: 07/2021</p>	<p>Company: BnK Solution</p> <p>Website: <a href="https://bnksolution.com/">https://bnksolution.com/</a></p> <p>Job Title: Software Engineer</p> <p>Job Description: Teamwork, autonomy in work, projects implementation for customers ...</p>
<p>From: 08/2021</p> <p>To: Now</p>	<p>Company: HITD - High digital technology joint stock company</p> <p>Job Title: Software Engineer</p> <p>Job Description: Developing software solutions that adhere to best practices in software development, quality assurance, and security.</p> <p>Finding and troubleshooting software defects and performance issues and implementing proper solutions.</p> <p>Participating in code reviews to support code quality and ensure adherence to coding standards ...</p>

## APPENDIX - PROJECT REFERENCE AND SKILL SET

ATTENDED PROJECTS		
<p>From: 04/2020</p> <p>To: 07/2021</p>	Project Name:	Knowdo
	Company:	Bnk Solution
	Client:	Japan
	Project size:	1.5 years
	Position:	Software Engineer
	Responsibilities:	The jobs are taken as: - Code & debug
	Project Description:	- Issue tracking and project management
	Used Programming Languages:	- PHP, JavaScript
	Tools/Hardware	- Git
<p>From: 12/2019</p> <p>To: 10/2020</p>	Project Name:	Smart Factory
	Company:	Bnk Solution
	Client:	Viet Nam
	Position:	Software Engineer

	Responsibilities:	Assigned jobs such as: - Experimental to evaluate and analyze the correct system of the customer needed. - From there, write the required analysis materials, functional design. - Take part in the form code in the software. - Deploying projects for customers, getting customers' opinions and assessments to continue developing and perfecting the software.
	Project Description:	- A local software for a smart factory for managers to control shifts, assets, notification, tasks, reports and for staffs to leave request and feedback
	Used Programming Languages:	JavaScript
	Tools/Hardware	NestJS, Angular, Git
From: 09/2020 To: 03/2021	Project Name:	Bank
	Company:	BnK Solution
	Client:	Viet Nam
	Position:	Backend develops
	Responsibilities:	Assigned jobs such as: - Code of system modems, functions as needed. - Deploy, maintain, fix bugs.
	Project Description:	- A project digital transformation of bank
	Technical Stack	NestJS
	Tools/Hardware	Jira, AWS, Active MQ, Kubenester, Jenkin, ...
From: 05/2020 To: 09/2020	Project Name:	E-commerce
	Company:	Bnk Solution
	Client:	Japan
	Position:	Software Engineer,
	Responsibilities:	Assigned jobs such as: - Analyzing customer requirements - Make the demo prototype functional - Coding frontend - Coding Backend - Deploy products
	Project Description:	A website auto drop ship to eBay
	Used Programming Languages:	Vuejs, ruby
	Tools/Hardware	Git, Window server, AWS,
From: 08/2021 To: 11/2021	Project Name:	COVID-19 Infection Management and Tracing System
	Company:	HITD - High digital technology joint stock company

	Client:	Vietnam
	Project size:	3 months
	Position:	Developer
	Responsibilities:	Assigned jobs such as: - Coding frontend, backend - Deploy products
	Technical Stack	Reacts, NestJs
	Tools/Hardware	Git, Linux server, docker
From: 12/2021 To: 04/2023	Project Name:	Human resource manager
	Company:	HITD - High digital technology joint stock company
	Client:	Vietnam
	Position:	Developer
	Responsibilities:	Assigned jobs such as: - Building an architecture and designing a system that meets the requirements, including databases, user interfaces, and other software components. - Software Development: Coding frontend, backend - Deploy products
	Project Description:	The project is an internal management system consisting of functions such as requesting leave, ordering meals, and managing tasks, salary, notification
	Used Programming Languages:	Reacts, NestJs, Odoo, Python
From: 04/2023 To: 11/2023	Tools/Hardware	Git, Linux server, docker, Kubernetes
	Project Name:	Intelligent Traffic Violation Detection
	Company:	HITD - High digital technology joint stock company
	Client:	Vietnam
	Position:	Developer
	Responsibilities:	Assigned jobs such as: - Coding backend - Deploy products use Kubernetes
	Project Description:	The system uses AI features to detect, alert, and analyze traffic flow and traffic violations on the road.
	Technical Stack	NestJs, Python
From: 07/2023 To: 12/2023	Tools/Hardware	Git, Linux server, docker, Kubernetes
	Project Name:	Video Object Detection, Tracking and Analysis
	Company:	HITD - High digital technology joint stock company
	Client:	Vietnam
	Project size:	5 months

	Position:	Developer
	Responsibilities:	Assigned jobs such as: - Coding backend - Deploy products
	Project Description:	The system employs AI technology to recognize and track human vehicles based on video analysis results
	Used Programming Languages:	NestJs, Python
	Tools/Hardware	Git, Linux server, docker
From: 12/2023 To: 06/2024	Project Name:	Intelligent Transportation System
	Company:	HITD - High digital technology joint stock company
	Client:	Vietnam
	Position:	Developer
	Responsibilities:	Assigned jobs such as: - Coding backend - Deploy products
	Project Description:	Intelligent Transportation System uses advanced technologies and methods such as artificial intelligence (AI), sensors, telecommunications networks, and geographic information systems (GIS) to collect, process, and analyze traffic data.
	Technical Stack	NestJs, Python
	Tools/Hardware	Git, Linux server, docker
